AssetMagic

Tracking Today, Securing Tomorrow

Track & Manage Fixed Asset

AssetMagic is an asset management software designed to help businesses track, manage, and optimize their assets. It typically offers features such as asset tracking, maintenance management, inventory management, depreciation tracking, and reporting. This software is useful for organizations that need to keep a detailed record of their physical and digital assets, ensuring efficient utilization, maintenance, and compliance.

You Can Depend On Us!

Key Components

- Asset Management

- Asset Accounting

- Asset Tracking

- Asset Performance Management

- Asset Transactions

- Life Cycle Monitoring

- Accurate Depreciation Calculation

- Bulk calculation of Depreciation

- Data Visual and Representation

- Shows urgent information, alerts, and warnings

- Multiple Depreciation policy

- Management of Service Providers.

- Reminder Pop-ups on expiry

- Time to time Asset Verification

- Accurate Asset Market Value

- Asset Performance Reports

- Maintenance Cost Reports

- Data Collection and Analysis

- Features data in the form of responsive tiles

Introduction

Improved Regulatory and Security

• With asset tracking systems such as FAMS, it becomes easier to store and track data accurately.
• Easy to record every action logged by users, and role-based access permissions ensure that only authorized personnel can access sensitive data.

Accurate Reporting

• Offers companies real-time data on how each asset functions
• Streamlines the management process, improving the overall profitability of your organization.
• Helps reduce human errors in asset performance monitoring

Reduced Maintenance Expenses

• Asset Expert software stores essential information about assets and notifies them according to the expiration of their life.
• Also aids in maintenance task scheduling and alert generation
• Reducing unnecessary costs due to mismanagement of assets
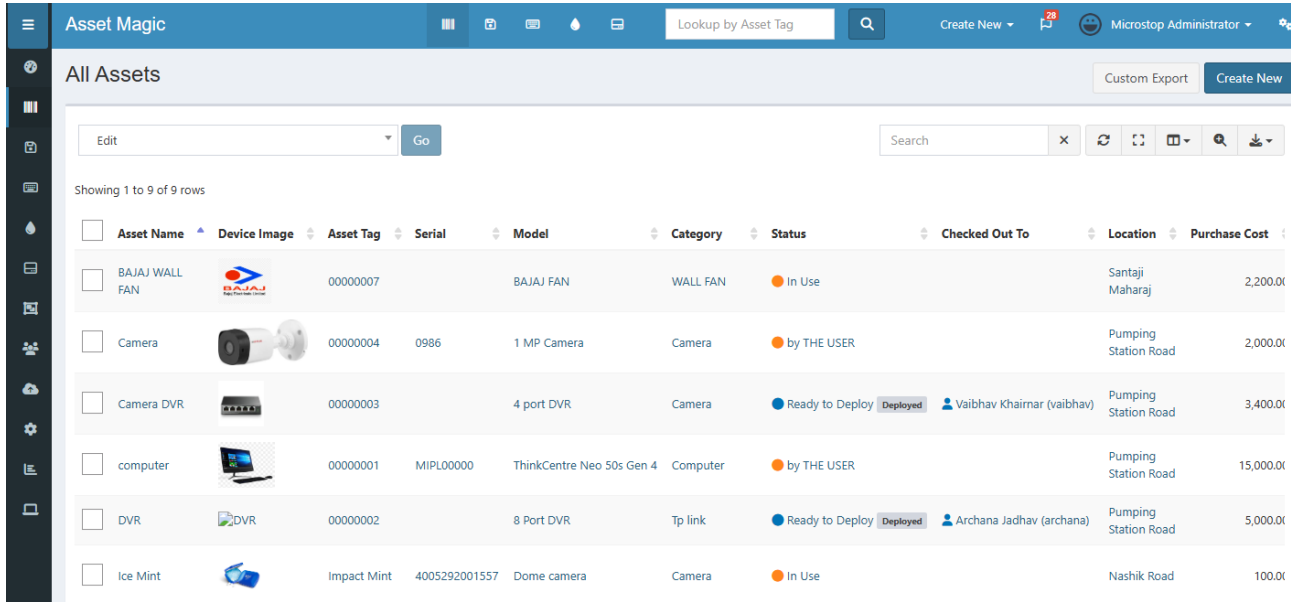

Streamlined Operations

• Critical for determining which assets in the organization are under user, their location, their cost center, etc.
• To receive status updates on the process when needed.
• Eliminates unnecessary steps from daily operations, making them more efficient and faster

Budgeting and Cost Reduction

• A reliable storing and tracking system for keeping track of stock levels and materials. Gives companies total control over their current stock and potential purchasing decisions. Asset Life Cycle
• Asset traits like asset depreciation, can predict individual asset life spans and allow them to be replaced.
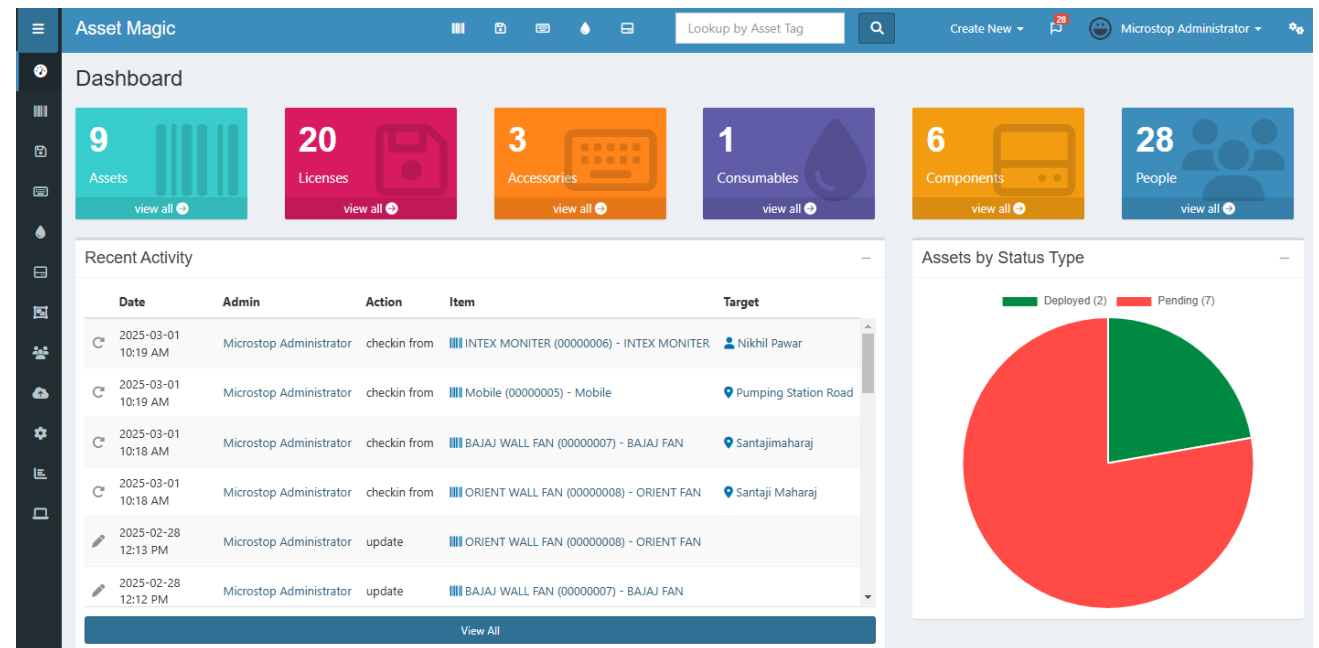

Asset Management

Easily see which assets are assigned, to whom, and their physical location. Check them back into inventory with one click, or click through to see the asset's complete history. Seeing what assets are currently deployed, pending (brand new awaiting software installs, out for repair), ready to deploy, or archived (lost/stolen, or broken) is quick and easy

➢ Easily see which assets are assigned, to whom, and their physical location

➢ One-click checkin

➢ Asset Models let you group common features

➢ Require User Acceptance (End-User EULAs/Terms of Service) on Checkout

➢ Email alerts for expiring warrantees and licenses

➢ Integrates with most handheld barcode scanners and QR code reader apps

➢ Quick and easy asset auditing

➢ Add your own custom fields for additional asset attributes

➢ Easily import and export assets

➢ Generate QR code labels for easy mobile access and labels

➢ Assets marked as requestable can be requested by a user

➢ Assets retain full history including checkouts, checkins and maintenance

➢ Optional digital signatures on asset acceptance

Admin Dashboard

At-a-glance access to recent activity and an overall view of what assets, accessories, consumables, and components you have.

Items that have been checked in, checked out, recently updated or deleted, show up in a recent activity snapshot.

License Management

You get the same quick access with licenses, too. We're working on making this even better, by letting you smartly handle multi-pack licenses with ease. Enable email alerts to get an email when your licenses are expiring.

Asset Life Cycle

Planning - Planning is the first stage of the asset Life Cycle. It establishes asset requirement based on evaluation of Existing Assets.

Acquisition - This begins the life cycle of the asset. Once the asset I Identified, acquired and installed into the business, it can then be tracked throughout its entire life cycle process.

Operations & Maintenance - This stage indicates the application and management of an asset, including insurance, verification, AMC, etc.

Disposal - The end of the Asset's Life Cycle. It is removed from service and either sold, discarded, or shifted out.

High End Features

Asset Life Cycle Management

- Asset Management
- Asset Tracking
- Asset Accounting
- Asset Performance Management
- Asset Transactions
- Life Cycle Monitoring

Service Masters Management

- Management of Service Providers.
- Reminder Pop-ups on expiry
- From time to time Asset Verification
- Accurate Asset Market Value

Maintenance Management

- Warranties
- Service Providers
- Asset Consumption and Condition Maintenance
- Component Management

Depreciation Methods

- Accurate Depreciation Calculation
- Bulk calculation of Depreciation
- Asset Card available for assets after depreciation
- Multiple Depreciation policies can be created and calculated accordingly.

Analytics & Reporting

- Asset Performance Reports
- Maintenance Cost Reports
- Data Collection and Analysis
- Data Visualization and Representation

Dashboard & Widgets

- Provides an overview of the software to the user
- Offers data about the current status
- Shows urgent information, alerts, and warnings
- Features data in the form of responsive tiles.

Top Benefits & Features

FEATURES	BENEFIT
• Centralize data • Easy Asset Management • User-Friendly Interface • Asset Information Management • Extend Asset Life Spans • Quick Understanding of the Application • Improve Efficiency • Increase Productivity • Better Visibility • One-time master Setup.	• Creation of Multiple Master Data • Centralized Depreciation Policies • Easy Maintenance of multiple assets at once. • Accurate Importing of Data • QR Code & Bar Code Scanner • RFID Tagging and Verification • Asset Adjustment, Split, Shift available. • Repairs and Maintenance scheduled with reminders • Audit Trail • Multiple User Accessibility
